

MEPR500 Multi-Function Document Reader for GoENTRA Visitor Management System

The MEPR500 is a high performance, multi-functional document reader fully integrated with the GoENTRA visitor management system.

This document reader offers fast and reliable capture of ID documents, passports and other travel documents. It is fully capable to capture the complete ID document with visible or IR light, extract the document photo, read the MRZ text information and perform OCR (optical character recognition) for comprehensive data extraction. Visitor registration is fast and efficient without compromising security.

Key Features

- Read and capture data from a wide range of documents including passports, ID cards, driving license and travel documents
- 400 dpi high resolution imaging with visible, IR and UV light ensures clear and accurate image capture
- IP50 robust design for dust ingress protection suitable for use in various environments
- User-friendly interface with clear status indicators and feedback for easy operation
- Automatic read triggering and fast processing streamline visitor check-in and minimizes wait times
- Advanced authentication features deter fraud and ensure only valid documents are accepted during registration
